

Introduction to Machine Guarding (Course 726)

Machine Safeguarding Training

Unguarded machinery claims many limbs and lives from workers around the world each year. This course aids employers, employees, machine manufacturers, machine guard designers and fabricators, and all others with an interest in protecting workers against the hazards of moving machine parts and from potential machine injuries. It identifies the major mechanical motions and the general principles of safeguarding them. There is also emphasis placed on the importance of machine maintenance and repair.

During the training **six (6) topics** will be discussed:

1. **Machine Guarding Basics;**
2. **Machine Guards;**
3. **Machine Devices;**
4. **Other Methods;**
5. **Design and Construction;**
6. **Maintenance and Repair;**
7. **Program Management.**

Certificate : OSHAcademy Course Completion Certificate.

Required prior education : None (Target Audience: **Employee, Supervisor, Manager**).

Course Duration : 5 Hours (0.5 IACET CEUs).
