

Introduction to Safety Management (Course 700)

Safety Management System Training

According to the OSHA Act, every employer has a legal obligation to furnish a place of employment free from known hazards. This course teaches how to develop an effective proactive safety management system using time-tested methods successful in various organizations. It discusses critical elements of a successful safety management system, including developing safety programs, policies, plans, processes, and procedures.

During the training **eight (8) topics** will be discussed:

1. **Commitment and Leadership;**
2. **Accountability;**
3. **Employee Involvement;**
4. **Safety Communications;**
5. **Hazard Identification and Control Strategies;**
6. **Accident Investigation;**
7. **Safety Education and Training;**
8. **Continuous Improvement** (Principles of Total Quality Safety Management).

Certificate : OSHAcademy Course Completion Certificate.

Required prior education : None (Open to all levels, including Employees, Supervisors, and Managers).
