

Offshore Oil and Gas Safety II (Course 909)

Offshore Safety Training

This is the second of a two-part introduction to offshore safety practices. Offshore oil and gas operations include all activities involved in the extraction of crude oil and natural gas from reservoirs found beneath the seafloor. This course has been developed as a source of information and practical training tool for offshore rig safety personnel, operator/contractor employees, supervisors, and managers who need to be familiar with offshore rig safety.

During the training **seven (7) topics** will be discussed:

1. **Electrical Safety Practices;**
2. **Hazardous Energy Control (Lockout/Tagout);**
3. **Tools and Equipment Safety;**
4. **Crane Operator Qualifications and Best Practices;**
5. **Control of Hazardous Chemicals and Substances;**
6. **Material Handling, Rigging, and Lifting Safety;**
7. **Miscellaneous Best Practices.**

Certificate : OSHAcademy Course Completion Certificate.

Required prior education : None (Target Audience: **Employee, Supervisor, Manager, Contractor**).

Course Duration : 6 Hours (0.6 IACET CEUs).
